Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Officer's Responsibilities and Approval

I am responsible for the preparation of these financial statements for the year ended 30 June 2019, as set out in terms of Section 126(1) of the Municipal Finance Management Act (Act 56 of 2003) and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors as disclosed in note 18 of these annual financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act (Act 20 of 1998) and the Minister of Provincial and Local Government's determination in accordance with this Act.

The accounting officer is required by the Municipal Finance Management Act (Act 56 of 2003), to maintain adequate accounting records and is responsible for the content and integrity of the annual financial statements and related financial information included in this report. It is the responsibility of the accounting officer to ensure that the annual financial statements fairly present the state of affairs of the municipality as at the end of the financial year and the results of its operations and cash flows for the period then ended. The external auditors are engaged to express an independent opinion on the annual financial statements and was given unrestricted access to all financial records and related data.

The annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practice (GRAP) including any interpretations, guidelines and directives issued by the Accounting Standards Board.

The annual financial statements are based upon appropriate accounting policies consistently applied and supported by reasonable and prudent judgements and estimates.

The accounting officer acknowledges that she is ultimately responsible for the system of internal financial control established by the municipality and place considerable importance on maintaining a strong control environment. To enable the accounting officer to meet these responsibilities, she sets standards for internal control aimed at reducing the risk of error or deficit in a cost effective manner. The standards include the proper delegation of responsibilities within a clearly defined framework, effective accounting procedures and adequate segregation of duties to ensure an acceptable level of risk. These controls are monitored throughout the municipality and all employees are required to maintain the highest ethical standards in ensuring the municipality's business is conducted in a manner that in all reasonable circumstances is above reproach. The focus of risk management in the municipality is on identifying, assessing, managing and monitoring all known forms of risk across the municipality. While operating risk cannot be fully eliminated, the municipality endeavours to minimise it by ensuring that appropriate infrastructure, controls, systems and ethical behaviour are applied and managed within predetermined procedures and constraints.

The accounting officer is of the opinion, based on the information and explanations given by management, that the system of internal control provides reasonable assurance that the financial records may be relied on for the preparation of the annual financial statements. However, any system of internal financial control can provide only reasonable, and not absolute, assurance against material misstatement or deficit.

The accounting officer has reviewed the municipality's cash flow forecast for the year 30 June 2020 and, in the light of this review and the current financial position, she is satisfied that the municipality has or has access to adequate resources to continue in operational existence for the foreseeable future.

Mazibuko Nokuthula
Municipal Manager

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Officer's Report

The accounting officer submits her report for the year ended 30 June 2019.

1. Review of activities

Main business and operations

The municipality is engaged in local government activities, which includes planning and promotion of integrated development plan and supplying of the services to the community which are water, sanitation, fire and environmental health services.

Net surplus of the municipality was R 204 376 110 (2018: surplus R 246 725 833).

2. Going concern

We draw attention to the fact that at 30 June 2019, the municipality had an accumulated surplus of R 2 698 623 722 and that the municipality's total assets exceed its liabilities by R 2 698 623 722.

The annual financial statements have been prepared on the basis of accounting policies applicable to a going concern. This basis presumes that funds will be available to finance future operations and that the realisation of assets and settlement of liabilities, contingent obligations and commitments will occur in the ordinary course of business.

3. Subsequent events

The accounting officer is not aware of any matter or circumstance arising since the end of the financial year.

4. Accounting policies

The annual financial statements prepared in accordance with the South African Statements of Generally Accepted Accounting Practice (GAAP), including any interpretations of such Statements issued by the Accounting Practices Board, and in accordance with the prescribed Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board as the prescribed framework by National Treasury.

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1. Presentation of Annual Financial Statements

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention unless specified otherwise.

These annual financial statements have been prepared in accordance with the Standards of Generally Recognised Accounting Practice (GRAP), issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act (Act 56 of 2003).

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP.

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

These accounting policies are consistent with the previous period.

1.1 Presentation currency

These annual financial statements are presented in South African Rand, which is the functional currency of the municipality.

1.2 Going concern assumption

These annual financial statements have been prepared based on the expectation that the municipality will continue to operate as a going concern for at least the next 12 months.

1.3 Materiality

Material omissions or misstatements of items are material if they could, individually or collectively, influence the decisions or assessments of users made on the basis of the financial statements. Materiality depends on the nature or size of the omission or misstatement judged in the surrounding circumstances. The nature or size of the information item, or a combination of both, could be the determining factor.

Assessing whether an omission or misstatement could influence decisions of users, and so be material, requires consideration of the characteristics of those users. The Framework for the Preparation and Presentation of Financial Statements states that users are assumed to have a reasonable knowledge of government, its activities, accounting and a willingness to study the information with reasonable diligence. Therefore, the assessment takes into account how users with such attributes could reasonably be expected to be influenced in making and evaluating decisions.

1.4 Comparative figures

Where necessary, comparative figures have been reclassified to conform to changes in presentation in the current year.

When the presentation or classification of items in the annual financial statements is amended, prior period comparative amounts are restated. The nature and reason for the reclassification is disclosed. Where accounting errors have been identified in the current year, the correction is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly. Where there has been a change in accounting policy in the current year, the adjustment is made retrospectively as far as is practicable, and the prior year comparatives are restated accordingly.

1.5 Standards, amendments to standards and interpretations issued but not yet effective

The following GRAP standards have been issued but are not yet effective and have not been early adopted by the municipality:

No.	Title of Standard	Impact on GRAP Reporting Framework
GRAP 32	Service concession Arrangements: Grantor	No impact as the municipality is not an Entity
GRAP 108	Statutory Receivables	No impact
GRAP 109	Accounting by Principals and agents	No impact

An effective date is yet to be determined for the other standards by the Minister.

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.6 Property, plant and equipment

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Depreciation

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Item	Average useful life
Buildings	10-55
Furniture and fixtures	5-13
Motor vehicles	
• Specialised services	5-17
• Other vehicles	5-17
Machinery and equipment	5-17
IT equipment	5-20
Computer software	5-13
Infrastructure	
• Roads and paving	15-50
Community	
• Buildings	10-55
• Security	3-10
Other equipment	
• Copiers	3-6
• Telephones	3-6
• Emergency Equipment	5-8
Communication equipment	3-6
Leased assets	
• Office Equipment	1-10
Wastewater network	
• Sewerage	15-50
Water network	
• Water maintenance and purification	15-55
• Water reservoir	30-55

The residual value, the useful life and depreciation method of each asset are reviewed at least at of each reporting date. If the expectations differ from previous estimates, the change is accounted for as a change in accounting estimate.

Reviewing the useful life of an asset on an annual basis does not require the entity to amend the previous estimate unless expectations differ from the previous estimate.

Each part of an item of property, plant and equipment with a cost that is significant in relation to the total cost of the item is depreciated separately.

The depreciation charge for each period is recognised in surplus or deficit unless it is included in the carrying amount of another asset.

Items of property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use or disposal of the asset.

m-m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.6 Property, plant and equipment (continued)

The gain or loss arising from the derecognition of an item of property, plant and equipment is included in surplus or deficit when the item is derecognised. The gain or loss arising from the derecognition of an item of property, plant and equipment is determined as the difference between the net disposal proceeds, if any, and the carrying amount of the item.

Initial recognition

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary costs of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an item of property, plant and equipment is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, its deemed cost is the carrying amount of the asset(s) given up.

Major spare parts and servicing equipment qualify as property, plant and equipment when the municipality expects to use them during more than one period. Similarly, if the major spare parts and servicing equipment can be used only in connection with an item of property, plant and equipment, they are accounted for as property, plant and equipment.

Subsequent measurement - cost

Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life.

Where the municipality replaces parts of an asset, it derecognises the part of the asset being replaced and capitalises the new component. Subsequent expenditure incurred on an asset is capitalised when it increases the capacity or future economic benefits associated with the asset.

Depreciation

Depreciation is calculated on the depreciable amount, using the straight-line method over the estimated useful lives of the assets. Components of assets that are significant in relation to the whole asset and that have different useful lives are depreciated separately. The annual depreciation rates are based on the following estimated average asset lives:

Derecognition

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

1.7 Impairment of non-cash-generating assets

Cash-generating assets are assets used with the objective of generating a commercial return. Commercial return means that positive cash flows are expected to be significantly higher than the cost of the asset.

Non-cash-generating assets are assets other than cash-generating assets.

Impairment is a loss in the future economic benefits or service potential of an asset, over and above the systematic recognition of the loss of the asset's future economic benefits or service potential through depreciation (amortisation).

m·m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.7 Impairment of non-cash-generating assets (continued)

Carrying amount is the amount at which an asset is recognised in the statement of financial position after deducting any accumulated depreciation and accumulated impairment losses thereon.

A cash-generating unit is the smallest identifiable group of assets managed with the objective of generating a commercial return that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or groups of assets.

Costs of disposal are incremental costs directly attributable to the disposal of an asset, excluding finance costs and income tax expense.

Depreciation (Amortisation) is the systematic allocation of the depreciable amount of an asset over its useful life.

Fair value less costs to sell is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable, willing parties, less the costs of disposal.

Recoverable service amount is the higher of a non-cash-generating asset's fair value less costs to sell and its value in use.

Useful life is either:

- the period of time over which an asset is expected to be used by the municipality; or
- the number of production or similar units expected to be obtained from the asset by the municipality.

Judgements made by management in applying the criteria to designate assets as non-cash-generating assets or cash-generating assets, are as follows:

Identification

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

The municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the entity also test a non-cash-generating intangible asset with an indefinite useful life or a non-cash-generating intangible asset not yet available for use for impairment annually by comparing its carrying amount with its recoverable service amount. This impairment test is performed at the same time every year. If an intangible asset was initially recognised during the current reporting period, that intangible asset was tested for impairment before the end of the current reporting period.

Reversal of an impairment loss

The municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non-cash-generating asset may no longer exist or may have decreased. If any such indication exists, the municipality estimates the recoverable service amount of that asset.

An impairment loss recognised in prior periods for a non-cash-generating asset is reversed if there has been a change in the estimates used to determine the asset's recoverable service amount since the last impairment loss was recognised. The carrying amount of the asset is increased to its recoverable service amount. The increase is a reversal of an impairment loss. The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined (net of depreciation or amortisation) had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit.

Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

After a reversal of an impairment loss is recognised, the depreciation (amortisation) charge for the non-cash-generating asset is adjusted in future periods to allocate the non-cash-generating asset's revised carrying amount, less its residual value (if any), on a systematic basis over its remaining useful life.

1.8 Intangible assets

Initial Recognition

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.8 Intangible assets (continued)

An intangible asset is an identifiable non-monetary asset without physical substance. Examples include computer software, licences, and development costs. The municipality recognises an intangible asset in its Statement of Financial Position only when it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality and the cost or fair value of the asset can be measured reliably.

Internally generated intangible assets are subject to strict recognition criteria before they are capitalised. Research expenditure is never capitalised, while development expenditure is only capitalised to the extent that:

- the municipality intends to complete the intangible asset for use or sale
- it is technically feasible to complete the intangible asset
- the municipality has the resources to complete the project; and
- it is probable that the municipality will receive future economic benefits or service potential.

Intangible assets are initially recognised at cost.

Where an intangible asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of that asset on the date acquired.

Where an intangible asset is acquired in exchange for a non-monetary asset or monetary assets, or a combination of monetary and non-monetary assets, the asset acquired is initially measured at fair value (the cost). If the acquired item's fair value was not determinable, it's deemed cost is the carrying amount of the asset(s) given up.

Subsequent measurement -cost model

Intangible assets are subsequently carried at cost less accumulated amortisation and impairments. The cost of an intangible asset is amortised over the useful life where that useful life is finite. Where the useful life is indefinite, the asset is not amortised but is subject to an annual impairment test.

Amortisation and impairment

Amortisation is charged so as to write off the cost or valuation of intangible assets over their estimated useful lives using the straight line method. The annual amortisation rates are based on the following estimated average asset lives:

Computer software	5-13
-------------------	------

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at each reporting date and any changes are recognised as a change in accounting estimate in the Statement of Financial Performance

The municipality tests intangible assets with finite useful lives for impairment where there is an indication that an asset may be impaired. An assessment of whether there is an indication of possible impairment is done at each reporting date. Where the carrying amount of an item of an intangible asset is greater than the estimated recoverable amount (or recoverable service amount), it is written down immediately to its recoverable amount (or recoverable service amount) and an impairment loss is charged to the Statement of Financial Performance.

Derecognition

Intangible assets are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an intangible asset is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance.

Website costs

The municipality has a website designed for internal and external access. The municipality is at the operating stage which comprises maintaining and enhancing applications, infrastructure, graphical design and the content of the file. The municipality incurs internally generated costs on the operation of the website and the costs are therefore expensed.

1.9 Inventories

Inventories are initially measured at cost except where inventories are acquired through a non-exchange transaction, then their costs are their fair value as at the date of acquisition.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.9 Inventories (continued)

Subsequently inventories are measured at the lower of cost and net realisable value.

Net realisable value is the estimated selling price in the ordinary course of operations less the estimated costs of completion and the estimated costs necessary to make the sale, exchange or distribution.

The cost of inventories comprises of all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

The cost of inventories is assigned using the weighted average cost formula. The same cost formula is used for all inventories having a similar nature and use to the municipality.

When inventories are sold, the carrying amounts of those inventories are recognised as an expense in the period in which the related revenue is recognised. If there is no related revenue, the expenses are recognised when the goods are distributed, or related services are rendered. The amount of any write-down of inventories to net realisable value or current replacement cost and all losses of inventories are recognised as an expense in the period the write-down or loss occurs. The amount of any reversal of any write-down of inventories, arising from an increase in net realisable value or current replacement cost, are recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

Initial recognition

Inventories assets in the form of materials or supplies to be consumed or distributed in the rendering of service. Inventories are initially recognised at cost. Cost generally refers to the purchase price, plus taxes, transport costs and any other costs in bringing the inventories to their current location and condition.

Where inventory is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the item on the date.

Consumable inventory is valued using the weighted average cost whilst water inventory is valued using the weighted average cost method.

Subsequent measurement

Inventories, consisting of consumable stores and raw materials, are valued at the lower of cost and net realisable value unless they are to be distributed at no or nominal charge, in which case they are measured at the lower of cost and current replacement cost. Redundant and slow-moving inventories are identified and written down in this way. Differences arising on the valuation of inventory are recognised in the Statement of Financial Performance in the year in which they arose. The amount of any reversal of any write-down of inventories arising from an increase in net realisable value or current replacement cost is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

The carrying amount of inventories is recognised as an expense in the period that the inventory was distributed, written off or consumed, unless that cost qualifies for capitalisation to the cost of another asset.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.10 Financial instruments

Classification

Financial instrument is any contract that gives rise to a financial asset of one municipality and a financial liability or a residual interest of another municipality

Financial instruments comprise of financial assets and liabilities in accordance with GRAP 104.

A financial asset is cash; a residual interest of another municipality; or a contractual right to receive cash or another financial asset from another municipality or exchange financial assets or financial liabilities with another municipality under conditions that are potentially favourable to the municipality.

A residual interest is any contract that entitles the holder to an interest in the assets of an municipality after deducting all of its liabilities (i.e. net assets).

A financial liability is any liability that is a contractual obligation to deliver cash or another financial asset to another municipality; or exchange financial assets or financial liabilities under conditions that are potentially unfavourable to the municipality.

Financial instruments, depending on its category, are initially measured at fair value, cost or amortised costs in accordance with GRAP 104. Transaction costs are only included in financial instruments that are initially measured at amortised costs.

Initial recognition and measurement

Financial instruments classified at fair value (fair value measurement considerations)

The best evidence of fair value is a quoted price in an active market.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, broker, dealer, etc., and those prices represent actual and regularly occurring market transactions on an arm's length basis.

Short-term receivables and payables with no stated interest rate is be measured at the original invoice amount if the effect of discounting is immaterial.

Where there is no active market, the fair value is determined using a valuation technique such as;

- Additional text recent arm's length market transaction;
- if available, reference to the current fair value of another instrument that is substantially the same;
- discounted cash flow analysis, discounting the future receipts (payments) of a financial instrument over the period of the contract, by using a market interest rate (adjusted for credit risk), to its present value.

Financial instruments classified at cost

If the fair value of a financial instrument cannot be reliably measured, it is measured at cost.

Financial assets at fair value are subsequently measured by using the fair value measurement considerations.

Any gains or losses due to changes in fair market value during the period are reported as gains or losses in the statement of financial performance, because such investments will usually be sold in the near future at their market value.

This effective interest rate method is used for these financial instruments. The interest rate used is necessary to discount the estimated stream of principal and interest cash flows through the expected life of the financial instrument to equal the amount recognised at initial recognition. The rate is then applied to the carrying amount at each reporting date to determine the interest expense or revenue for the period

Financial instruments classified at amortised cost

For financial instruments measured at amortised cost, the interest expense (for financial liabilities) or revenue (for financial assets) is calculated by using the effective interest rate method. The interest rate used is equal to the prevailing rate of return for financial instruments having substantially the same terms and characteristics of the municipality's financial instrument which include:

- the credit quality;
- the remaining term over which the contractual interest rate is fixed;
- the remaining period to repayment of the principal; and
- the currency (if applicable).

m-m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.10 Financial Instruments (continued)

Subsequent measurement

Impairment and uncollectability of financial assets

At the end of each reporting period, the municipality assesses whether there is any objective evidence that a financial asset or group of financial assets is impaired.

Impairment and uncollectability of financial assets

If there is objective evidence that an impairment loss on a financial asset has occurred, the loss must be recognised in surplus or deficit. Objective evidence that a financial asset or group of assets is impaired can be as a result of the occurrence of one or more of the following events:

(a) Significant financial difficulty experienced by the borrower/debtor;

- Delays in payments (including interest payments) or failure to pay/defaults;
- For economic or legal reasons, allowing disadvantaged customers who are experiencing financial difficulties to pay as and when they can. The municipality would not otherwise have considered this concession. For example, allowing disadvantaged customers to pay their account when they can due to the fact the water it supplies to the customer is a basic human right;
- It is probable that the borrower/debtor will enter sequestration (bankruptcy) or other financial reorganisation;
- The disappearance of an active market for that financial asset because of financial difficulties; or
- Observable data, for example historical data, indicating that there is a decrease in the estimated future cash flows that will be received (which can be measured reliably), from a group of financial assets (financial assets with similar credit risk characteristics grouped together) since the initial recognition of those assets. The decrease may not yet be identified for the individual financial assets in the group. These can include:
 - the payment status of borrowers/debtors in the group has deteriorated (e.g. an increased number of delayed payments); or
 - national or local economic conditions that are in line with non-payments in the group (e.g. an increase in the unemployment rate in the geographical area of the borrowers/debtors, or adverse changes in market conditions that affect the borrowers/debtors in the group)

(b) An municipality assesses financial assets individually, when assets are individually significant, and individually or collectively for financial assets that are not individually significant. Where no objective evidence of impairment exists for an individually assessed asset (whether individually significant or not), an municipality includes the assets in a group of financial assets with similar credit risk characteristics and collectively assesses them for impairment.

The carrying amount of a financial asset is reduced directly through the use of an allowance account. The impairment loss is recognised in the statement of financial performance.

Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised, are not included in the collective assessment of impairment.

As soon as information becomes available that specifically identifies losses on individually impaired assets in a group (that are collectively assessed for impairment), those assets are removed from the group and assessed individually for impairment.

For collective assessment of impairment, as indicated above, assets with similar credit risk characteristics are grouped together. The credit risk characteristics should be indicative of the debtors' ability to pay all amounts due according to the contractual terms.

Receivables from exchange transactions

Trade and other receivables are initially designated at fair value.

Short-term receivables with no stated interest rate is to be measured at the original invoice amount if the effect of discounting is immaterial.

Payables from exchange transactions

Financial liabilities consist of trade payables. They are categorised as financial liabilities held at fair value.

Short-term payables with no stated interest rate is to be measured at the original invoice amount if the effect of discounting is immaterial.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.10 Financial instruments (continued)

Cash and cash equivalents

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets: loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities: other financial liabilities carried at amortised cost.

Gains and losses

Gains or losses can arise from both a financial asset and financial liability measured at fair value, at amortised cost or cost. Any gains and losses are recognised in the statement of financial performance.

Fair value - Changes in fair value will result in either a gain or loss.

Amortised costs and cost - gains and losses are recognised when derecognised, impaired or through the amortisation process.

Derecognition

Financial assets

The municipality derecognises a financial asset only when:

- the contractual rights to the cash flows from the financial asset expire, are settled or waived;
- the municipality transfers to another party substantially all the risks and rewards of the ownership of the asset; or
The municipality, despite having retained some significant risks and rewards of ownership of the financial asset, has transferred control of the asset to another party and the that party has the practical ability to sell the asset in its entirety to an unrelated third party, and is able to exercise that ability unilaterally and without needing to impose additional restrictions on the transfer.

If the municipality has not transferred substantially all of the risks and rewards of ownership of the financial asset, it should continue to recognise the asset.

Financial liabilities

The municipality derecognises a financial liability only when:

- Discharges the liability (or part thereof) by paying the creditor, normally with cash, other financial liabilities, goods or services;
- Waives the debt or it is assumed by another entity by way of a non-exchange transaction. These transactions are accounted for by considering the requirements in GRAP 104 and GRAP 23 - Revenue from Non-exchange Transactions (Taxes and Transfers).
- Is legally released from primary responsibility for the liability (or part of it) either by process of law (expires) or by the creditor (cancelled). If the debtor has given a guarantee, this condition may still be met; or

Impairment of financial assets

The municipality assesses at each statement of financial position date whether a financial asset or group of financial assets is impaired.

Assets are carried at amortised cost.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.10 Financial Instruments (continued)

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows (excluding future credit losses that have not been incurred) discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition). The carrying amount of the asset shall be reduced either directly or through the use of an allowance account. The amount of the loss shall be recognised in surplus or deficit. The municipality first assesses whether objective evidence of impairment exists individually for financial assets that are individually significant, and individually or collectively for financial assets that are not individually significant. If it is determined that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, the asset is included in a group of financial assets with similar credit risk characteristics and that group of financial assets is collectively assessed for impairment. Assets that are individually assessed for impairment and for which an impairment loss is or continues to be recognised are not included in a collective assessment of impairment.

1.11 Unauthorised expenditure

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No.56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance. The identified unauthorised expenditure is disclosed in the note to the annual financial statements in the year that it is incurred.

1.12 Irregular expenditure

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No.56 of 2003), the Municipal Systems Act (Act No.32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance. The identified irregular expenditure is disclosed in the note to the annual financial statements in the year that it is incurred.

1.13 Fruitless and wasteful expenditure

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance. The identified fruitless and wasteful expenditure is disclosed in the note to the annual financial statements in the year that it is incurred.

1.14 Provisions and Contingents

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at reporting date and adjusted to reflect the current best estimate. Where the effect is material, non-current provisions are discounted to their present value using a pre-tax discount rate that reflects the market's current assessment of the time value of money, adjusted for risks specific to the liability (for example in the case of obligations for the rehabilitation of land).

The municipality does not recognise a contingent liability or contingent asset. A contingent liability is disclosed unless the possibility of an outflow of resources embodying economic benefits is remote. A contingent asset is disclosed where an inflow of economic benefits is probable.

Future events that may affect the amount required to settle an obligation are reflected in the amount of a provision where there is sufficient objective evidence that they will occur. Gains from the expected disposal of assets are not taken into account in measuring a provision. Provisions are not recognised for future operating losses. The present obligation under an onerous contract is recognised and measured as a provision..

A provision for restructuring costs is recognised only when the following criteria over and above the recognition criteria of a provision have been met:

- a) The municipality has a detailed formal plan for the restructuring identifying at least:
 - the business or part of a business concerned;
 - the principal locations affected;

m-m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.14 Provisions and Contingents (continued)

- the location, function, and approximate number of employees who will be compensated for terminating their services;
- when the plan will be implemented; and

(b) The municipality has raised a valid expectation in those affected that it will carry out the restructuring by starting to implement that plan or announcing its main features to those affected by it.

1.15 Leases

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership.

Finance leases - lessee

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant, equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayment using the effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term..

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease

Operating leases - lessee

Operating lease payments are recognised as an expense on a straight-line basis over the lease term. The difference between the amounts recognised as an expense and the contractual payments are recognised as an operating lease asset or liability.

1.16 Revenue from exchange transactions

Revenue is the gross inflow of economic benefits or service potential during the reporting period when those inflows result in an increase in net assets, other than increases relating to contributions from owners.

An exchange transaction is one in which the municipality receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of goods, services or use of assets) to the other party in exchange.

Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

Measurement

Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts and volume rebates.

m:m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.16 Revenue from non-exchange transactions (continued)

Sale of goods

Revenue from the sale of goods is recognised when all the following conditions have been satisfied:

- the municipality has transferred to the purchaser the significant risks and rewards of ownership of the goods;
- the municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality; and
- the costs incurred or to be incurred in respect of the transaction can be measured reliably.

Rendering of services

When the outcome of a transaction involving the rendering of services can be estimated reliably, revenue associated with the transaction is recognised by reference to the stage of completion of the transaction at the reporting date. The outcome of a transaction can be estimated reliably when all the following conditions are satisfied:

- the amount of revenue can be measured reliably;
- it is probable that the economic benefits or service potential associated with the transaction will flow to the municipality;
- the stage of completion of the transaction at the reporting date can be measured reliably; and
- the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

When services are performed by an indeterminate number of acts over a specified time frame, revenue is recognised on a straight line basis over the specified time frame unless there is evidence that some other method better represents the stage of completion. When a specific act is much more significant than any other acts, the recognition of revenue is postponed until the significant act is executed.

When the outcome of the transaction involving the rendering of services cannot be estimated reliably, revenue is recognised only to the extent of the expenses recognised that are recoverable.

Interest Income

Revenue arising from the use by others of municipal assets yielding interest shall be recognised when:

- It is probable that the economic benefits or service potential associated with the transaction will flow to the municipality, and
- The amount of the revenue can be measured reliably. Interest shall be recognised on a time basis that takes into account the effective yield of interest

Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No.56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain.

1.17 Revenue from non-exchange transactions

Revenue comprises gross inflows of economic benefits or service potential received and receivable by an municipality, which represents an increase in net assets, other than increases relating to contributions from owners.

Conditions on transferred assets are stipulations that specify that the future economic benefits or service potential embodied in the asset is required to be consumed by the recipient as specified or future economic benefits or service potential must be returned to the transferor.

Control of an asset arise when the municipality can use or otherwise benefit from the asset in pursuit of its objectives and can exclude or otherwise regulate the access of others to that benefit.

Exchange transactions are transactions in which one entity receives assets or services, or has liabilities extinguished, and directly gives approximately equal value (primarily in the form of cash, goods, services, or use of assets) to another entity in exchange.

Expenses paid through the tax system are amounts that are available to beneficiaries regardless of whether or not they pay taxes.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.17 Revenue from non-exchange transactions (continued)

Fines are economic benefits or service potential received or receivable by entities, as determined by a court or other law enforcement body, as a consequence of the breach of laws or regulations.

Non-exchange transactions are transactions that are not exchange transactions. In a non-exchange transaction, an municipality either receives value from another municipality without directly giving approximately equal value in exchange, or gives value to another municipality without directly receiving approximately equal value in exchange.

Restrictions on transferred assets are stipulations that limit or direct the purposes for which a transferred asset may be used, but do not specify that future economic benefits or service potential is required to be returned to the transferor if not deployed as specified.

Stipulations on transferred assets are terms in laws or regulation, or a binding arrangement, imposed upon the use of a transferred asset by entities external to the reporting municipality.

Tax expenditures are preferential provisions of the tax law that provide certain taxpayers with concessions that are not available to others.

The taxable event is the event that the government, legislature or other authority has determined will be subject to taxation.

Taxes are economic benefits or service potential compulsorily paid or payable to entities, in accordance with laws and or regulations, established to provide revenue to government. Taxes do not include fines or other penalties imposed for breaches of the law.

Transfers are inflows of future economic benefits or service potential from non-exchange transactions, other than taxes.

Recognition

An inflow of resources from a non-exchange transaction recognised as an asset is recognised as revenue, except to the extent that a liability is also recognised in respect of the same inflow.

As the municipality satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it reduces the carrying amount of the liability recognised and recognises an amount of revenue equal to that reduction.

Measurement

Revenue from a non-exchange transaction is measured at the amount of the increase in net assets recognised by the municipality.

When, as a result of a non-exchange transaction, the municipality recognises an asset, it also recognises revenue equivalent to the amount of the asset measured at its fair value as at the date of acquisition, unless it is also required to recognise a liability. Where a liability is required to be recognised it will be measured as the best estimate of the amount required to settle the obligation at the reporting date, and the amount of the increase in net assets, if any, recognised as revenue. When a liability is subsequently reduced, because the taxable event occurs or a condition is satisfied, the amount of the reduction in the liability is recognised as revenue.

1.18 Events after reporting date

Recognised amounts in the financial statements are adjusted to reflect events arising after the balance sheet date that provide evidence of conditions that existed at the Balance Sheet date. Events after the Balance Sheet date that are indicative of conditions that arose after the Balance Sheet date are dealt with by way of a note to the Financial Statements.

1.19 Commitments

A commitment arises when a decision is made to incur a liability e.g. purchase order, delivery schedules or contract for construction of infrastructure assets. A commitment becomes a liability when the intention to agree to an outflow of resources outflow of resources becomes a present obligation.

The commitments are not recognised as a liability in the statement of financial position but are disclosed in the notes to the financial statements.

Accounting Policies

1.20 Employee benefits

Employee benefits are all forms of consideration given by an entity in exchange for service rendered by employees.

A qualifying insurance policy is an insurance policy issued by an insurer that is not a related party (as defined in the Standard of GRAP on Related Party Disclosures) of the reporting entity, if the proceeds of the policy can be used only to pay or fund employee benefits under a defined benefit plan and are not available to the reporting entity's own creditors (even in liquidation) and cannot be paid to the reporting entity, unless either:

- the proceeds represent surplus assets that are not needed for the policy to meet all the related employee benefit obligations; or
- the proceeds are returned to the reporting entity to reimburse it for employee benefits already paid.

Termination benefits are employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits.

Other long-term employee benefits are employee benefits (other than post-employment benefits and termination benefits) that are not due to be settled within twelve months after the end of the period in which the employees render the related service.

Vested employee benefits are employee benefits that are not conditional on future employment.

Composite social security programmes are established by legislation and operate as multi-employer plans to provide post-employment benefits as well as to provide benefits that are not consideration in exchange for service rendered by employees.

A constructive obligation is an obligation that derives from an entity's actions where by an established pattern of past practice, published policies or a sufficiently specific current statement, the entity has indicated to other parties that it will accept certain responsibilities and as a result, the entity has created a valid expectation on the part of those other parties that it will discharge those responsibilities.

Short-term employee benefits

Short-term employee benefits are employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service.

Short-term employee benefits include items such as:

- wages, salaries and social security contributions;
- short-term compensated absences (such as paid annual leave and paid sick leave) where the compensation for the absences is due to be settled within twelve months after the end of the reporting period in which the employees render the related employee service;
- bonus, incentive and performance related payments payable within twelve months after the end of the reporting period in which the employees render the related service; and
- non-monetary benefits (for example, medical care, and free or subsidised goods or services such as housing, cars and cellphones) for current employees.

When an employee has rendered service to the entity during a reporting period, the entity recognise the undiscounted amount of short-term employee benefits expected to be paid in exchange for that service:

- as a liability (accrued expense), after deducting any amount already paid. If the amount already paid exceeds the undiscounted amount of the benefits, the entity recognise that excess as an asset (prepaid expense) to the extent that the prepayment will lead to, for example, a reduction in future payments or a cash refund; and
- as an expense, unless another Standard requires or permits the inclusion of the benefits in the cost of an asset.

The expected cost of compensated absences is recognised as an expense as the employees render services that increase their entitlement or, in the case of non-accumulating absences, when the absence occurs. The entity measure the expected cost of accumulating compensated absences as the additional amount that the entity expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The entity recognise the expected cost of bonus, incentive and performance related payments when the entity has a present legal or constructive obligation to make such payments as a result of past events and a reliable estimate of the obligation can be made. A present obligation exists when the entity has no realistic alternative but to make the payments.

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.20 Employee benefits (continued)

Post-employment benefits

Post-employment benefits are employee benefits (other than termination benefits) which are payable after the completion of employment.

Post-employment benefit plans are formal or informal arrangements under which an entity provides post-employment benefits for one or more employees.

Multi-employer plans are defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that pool the assets contributed by various entities that are not under common control and use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the entity that employs the employees concerned.

Actuarial assumptions

Actuarial assumptions are unbiased and mutually compatible.

Financial assumptions are based on market expectations, at the reporting date, for the period over which the obligations are to be settled.

The rate used to discount post-employment benefit obligations (both funded and unfunded) reflect the time value of money. The currency and term of the financial instrument selected to reflect the time value of money is consistent with the currency and estimated term of the post-employment benefit obligations.

Post-employment benefit obligations are measured on a basis that reflects:

- estimated future salary increases;
- the benefits set out in the terms of the plan (or resulting from any constructive obligation that goes beyond those terms) at the reporting date; and
- estimated future changes in the level of any state benefits that affect the benefits payable under a defined benefit plan, if, and only if, either:
 - those changes were enacted before the reporting date; or
 - past history, or other reliable evidence, indicates that those state benefits will change in some predictable manner, for example, in line with future changes in general price levels or general salary levels.

Assumptions about medical costs take account of estimated future changes in the cost of medical services, resulting from both inflation and specific changes in medical costs.

Long term service awards and accumulated leave days

Long term service

Employees qualify for additional leave for various period of uninterrupted service in accordance with SALGBC condition of service. The long term service award measured in accordance with GRAP 25 through an actuarial valuation.

Accumulated leave days

Accumulated leave benefit accrues to employees unto maximum of 48 leave days. The benefits are paid in the events of death, disability, retrenchment or/and retirement. Employees who have leave days in excess of the 48 days for periods, before the conditions of service came to effect, are measured in accordance with GRAP 25 through an actuarial valuation.

1.21 Change in accounting policy, accounting estimates and prior period errors

Change in accounting estimate

Change in accounting estimate is an adjustment of the carrying amount of an asset or a liability, or the amount of the periodic consumption of an asset, that results from the assessment of the present status of, and expected future benefits and obligations associated with, assets and liabilities.

Changes in accounting estimates result from new information or new developments and, accordingly, are not corrections of errors. Any changes to the relevant financial items (associated with assets and liabilities) are made prospectively.

m-m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.21 Change in accounting policy, accounting estimates and prior period errors (continued)

Change in accounting policy

Accounting policies are the specific principles, bases, conventions, rules and practices applied by an municipality in preparing and presenting financial statements. Any changes to these policies arising from new or amended GRAP standards will be applied either retrospectively or prospectively if transitional provisions exists.

Prior period errors

Prior period errors are omissions from, and misstatements in, the municipality's financial statements for one or more prior periods arising from a failure to use, or misuse of, reliable information that:

- (a) was available when financial statements for those periods were authorised for issue; and
- (b) could reasonably be expected to have been obtained and taken into account in the preparation and presentation of those financial statements.

Such errors include the effects of mathematical mistakes, mistakes in applying accounting policies, oversights or misinterpretations of facts, and fraud.

A prior period error is corrected by retrospective restatement, except to the extent that it is impracticable to determine the period-specific or cumulative effect of the error.

When it is impracticable to determine the period-specific effects of an error on comparative information for one or more prior periods presented, the entity shall restate the opening balances of assets, liabilities and net assets for the earliest period for which retrospective restatement is practicable (which may be the current period).

When it is impracticable to determine the cumulative effect, at the beginning of the current period, of an error on all prior periods, the entity shall restate the comparative information to correct the error prospectively from the earliest date practicable.

1.22 Related parties

A related party is a person or an entity with the ability to control or jointly control the other party, or exercise significant influence over the other party, or vice versa, or an entity that is subject to common control, or joint control.

Control is the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Joint control is the agreed sharing of control over an activity by a binding arrangement, and exists only when the strategic financial and operating decisions relating to the activity require the unanimous consent of the parties sharing control (the venturers).

Related party transaction is a transfer of resources, services or obligations between the reporting entity and a related party, regardless of whether a price is charged.

Significant influence is the power to participate in the financial and operating policy decisions of an entity, but is not control over those policies.

Management are those persons responsible for planning, directing and controlling the activities of the municipality, including those charged with the governance of the municipality in accordance with legislation, in instances where they are required to perform such functions.

Close members of the family of a person are considered to be those family members who may be expected to influence, or be influenced by, that management in their dealings with the municipality.

The municipality is exempt from disclosure requirements in relation to related party transactions if that transaction occurs within normal supplier and/or client/recipient relationships on terms and conditions no more or less favourable than those which it is reasonable to expect the municipality to have adopted if dealing with that individual entity or person in the same circumstances and terms and conditions are within the normal operating parameters established by that reporting entity's legal mandate.

Where the municipality is exempt from the disclosures in accordance with the above, the municipality discloses narrative information about the nature of the transactions and the related outstanding balances, to enable users of the entity's financial statements to understand the effect of related party transactions on its annual financial statements.

M.M

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Accounting Policies

1.23 Budget information

The annual budget figures have been prepared in accordance with the GRAP standards, and are consistent with the accounting policies adopted by the Council for the preparation of these financial statements. The amounts are scheduled as a separate additional financial statement, called the statement of comparison of budget and actual amounts. Explanatory comments are provided in the notes to the annual financial statements.

The annual budget figures included in the financial statements are for the Municipality and these figures are those approved by the Council at the beginning and during the year.

The approved budget is prepared on an accrual basis and presented by economic classification linked to performance outcome objectives.

The approved budget covers the fiscal period from 01/07/2018 to 30/06/2019.

The annual financial statements and the budget are on the same basis of accounting therefore a comparison with the budgeted amounts for the reporting period have been included in the Statement of comparison of budget and actual amounts.

The Statement of comparative and actual information has been included in the annual financial statements as the recommended disclosure when the annual financial statements and the budget are on the same basis of accounting as determined by National Treasury and requirements of GRAP 25.

1.24 Value added tax

VAT is accounted for on an accrual basis and payable on the cash basis.

1.25 Commission expense

Commission expense is accounted for on an accrual basis.

9. Employee benefit obligations

Defined benefit plan

Post retirement medical aid plan

The municipality provides certain post-retirement medical benefits to qualifying employees/ pensioners. All post-retirement medical benefits are unfunded.

In accordance with prevailing legislation, the defined benefits funds are actuarially valued at intervals of not more than two years. The Projected Unit Credit valuation method is used. The latest valuation was performed as at 30 June 2019 by ZAQ Consultants and Actuaries.

The municipality has no legal obligations to settle this liability with any immediate contributions or additional once-off contributions. The municipality intends to contribute to each defined benefit post-retirement medical scheme in accordance with the latest recommendations of the actuary to each scheme.

The accumulated defined benefit obligation in respect of the post-retirement medical contributions are provided, based on calculations of independent actuaries, using methods and assumptions consistent with GRAP 25 (Employee Benefits) as follows:

Movement in the employee health-care liability

Liability as at 1 July	4 122 000	4 492 000
Benefits paid	(357 000)	(326 000)
Current Service Costs	-	-
Interest	393 000	440 000
Actuarial losses	64 000	(484 000)
	4 222 000	4 122 000
Current portion of liability	401 000	393 000
Non- current portion of liability	3 821 000	3 729 000
	4 222 000	4 122 000

Amounts recognised in the annual financial statements

Current service cost	-	-
Interest cost	393 000	440 000
Past service cost	-	-
Actuarial losses/(gains)	64 000	(484 000)
	457 000	(44 000)

Sensitivity analysis

As mentioned in the introduction of this report, the valuation is only an estimate of the cost of providing post-employment medical aid benefits. The actual cost to the Municipality will be dependent on actual future levels of assumed variables.

In order to illustrate the sensitivity of our results to changes in certain key variables, we have recalculated the liabilities using the following assumptions:

- 20% increase/decrease in the assumed level of mortality;
- 1% increase/decrease in the Medical aid inflation.

Mortality rate

Deviations from the assumed level of mortality experience of the current employees and the continuation members (pensioners) will have a large impact on the actual cost to the Municipality. If the actual rates of mortality turns out higher than the rates assumed in the valuation basis, the cost to the Municipality in the form of subsidies will reduce and vice versa.

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Notes to the Annual Financial Statements

Figures in Rand

2019

2018

9. Employee benefit obligations (continued)

We have illustrated the effect of higher and lower mortality rates by increasing and decreasing the mortality rates by 20%. The effect is as follows:

	-20% Mortality rate	Valuation Assumption	+20% Mortality rate
Total Accrued Liability	4 596 000	4 222 000	3 926 000
Interest Cost	438 000	401 000	371 000
Service Cost	-	-	-
	5 034 000	4 623 000	4 297 000

Medical aid inflation

The cost of the subsidy after retirement is dependent on the increase in the contributions to the medical aid scheme before and after retirement. The rate at which these contributions increase will thus have a direct effect on the liability of future retirees.

We have tested the effect of a 1% p.a. change in the medical aid inflation assumption. The effect is as follows:

	-1% Medical aid inflation	Valuation Assumption	+1% Medical aid inflation
Total Accrued Liability	3 873 000	4 222 000	4 627 000
Interest Cost	366 000	401 000	441 000
Service Cost	-	-	-
	4 239 000	4 623 000	5 068 000

Actuarial Loss/(Gain)

The combined Accrued Liability in respect of Post-employment medical aid liability is built-up as follows:

	Current Valuation date 30 June 2019	1 Year Following the Valuation Date	2 Years Following the Valuation Date	3 Years Following the Valuation Date
PV of the obligation as at the previous valuation date	4 222 000	4 257 000	4 287 000	4 317 000
Current Service Cost	-	-	-	-
Interest Cost	393 000	401 000	403 000	406 000
Actuarial Loss / (Gain)	64 000	-	-	-
	4 679 000	4 658 000	4 690 000	4 723 000

Membership Data

According to the information provided, the number of members entitled to receive postemployment medical aid subsidies from the Municipality were:

Category	30-06-2019 Valuation	30-06-2018 Valuation
Current (In Service) Members	6	6
Continuation Members (Pensioners)	6	6

Accrued Contractual Liability

The figures below reflect the total value of the accrued contractual liability of the Municipality in respect of post-employment medical aid benefits offered to employees:

Current Service Cost	-	-
	401 000	393 000

Valuation Method

The Projected Unit Credit funding method has been used to determine the past-service liabilities at the valuation date and the projected annual expense in the year following the valuation date.

Post-employment Medical Aid Liabilities

The expected value of each employee and their spouse's future medical aid subsidies is projected by allowing for future medical inflation. The calculated values are then discounted at the assumed discount interest rate to the present date of valuation (calculation). We also allowed for mortality, retirements and withdrawals from service as set out below. The accrued liability is determined on the basis that each employee's medical aid benefit accrues uniformly over the working life of an employee up until retirement. Further it is assumed that the current policy for awarding medical aid subsidies remains unchanged in the future. We assumed that 100% of all active members on medical aid will remain on medical aid once they retire. We also assumed that all active members will remain on the same medical aid option at retirement.

Valuation of Assets

As at the valuation date, the medical aid liability of the Municipality was unfunded, i.e. no dedicated assets have been set aside to meet this liability. We therefore did not consider any assets as part of our valuation.

Valuation Assumptions

In estimating the liability for post-employment medical aid benefits a number of assumptions are required. GRAP 25 places the responsibility on management to set these assumptions, as guided by the principles set out in GRAP 25 and in discussion with the actuary.

APN 301 states that the assumptions should be realistic and mutually compatible. The difference between the assumptions drives the valuation and it is very important to monitor how this difference changes from one valuation to the next. The most relevant actuarial assumptions used in this valuation are discussed below.

Financial Variables

The two most important financial variables used in our valuation are the discount- and medical aid inflation rates. We have assumed the following values for these variables:

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Notes to the Annual Financial Statements

Figures in Rand	2019	2018
9. Employee benefit obligations (continued)		
Financial Variable	Assumed Value 30-06-2019 (Current Valuation)	Assumed Value 30-06-2018 (Preceding Valuation)
Discount Rate	Yield Curve	Yield Curve
CPI (Consumer Price Inflation)	Difference between nominal and yield curves CPI+1%	Difference between nominal and yield curves CPI+1%
Medical Aid Contribution Inflation	Yield curve based**	Yield curve based**
Net Effective Discount Rate		

Discount Rate

GRAP 25 defines the determination of the Discount rate assumption to be used as follows:

"The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve."

*Statement of Financial Position (herein referred to as the "balance sheet").

We used the nominal and real zero curves as at **30 June 2019** as supplied by the JSE to determine our discount rates and CPI assumptions at each relevant time period

Medical Aid Inflation

The Medical Aid Contribution Inflation rate was set with reference to the past relationship between the (yield curve based) Discount Rate for each relevant time period and the (yield curve based) Medical Aid Contribution Inflation for each relevant time period.

South Africa has experienced high health care cost inflation in recent years. The annualised compound rates of increase for the last ten years show that registered medical aid schemes contribution inflation outstripped general CPI by almost 3% year on year. We do not consider these increases to be sustainable and have assumed that medical aid contribution increases would outstrip general inflation by 1% per annum over the foreseeable future.

Average Retirement Age

The average retirement age for all active employees was assumed to be **58** years. This assumption implicitly allows for ill-health and early retirements.

Normal Retirement Age

The normal retirement age (NRA) for all active employees was assumed to be **65** years.

Mortality Rates

Mortality before retirement has been based on the SA 85-90 mortality tables. These are the most commonly used tables in the industry. Mortality post-employment (for pensioners) has been based on the PA (90) ultimate mortality tables. No explicit assumption was made about additional mortality or health care costs due to AIDS.

Spouses and Dependents

m-m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Notes to the Annual Financial Statements

Figures in Rand

2019

2018

9. Employee benefit obligations (continued)

We assumed that the marital status of members who are currently married will remain the same up to retirement. It was also assumed that 90% of all single employees would be married at retirement with no dependent children. Where necessary it was assumed that female spouses would be five years younger than their male spouses at retirement and vice versa.

Long service award

The municipality provides long-service awards to its permanent employees

The benefit of long-service awards is provided in the form of annual leave and a gift to a certain monetary value.

In accordance with prevailing legislation, the defined benefits funds are actuarially valued at intervals of not more than two years. The Projected Unit Credit valuation method is used. The latest valuation was performed as at 30 June 2019 by ZAQ Consultants and Actuaries.

The municipality has no legal obligations to settle this liability with any immediate contributions or additional once-off contributions.

The accumulated defined benefit obligation in respect of the long-service awards are provided, based on calculations of independent actuaries, using methods and assumptions consistent with GRAP 25 (Employee Benefits) as follows:

Movement in the long-service award liability

Liability as at 1 July	11 794 000	11 179 000
Benefits paid	(959 000)	(1 699 000)

Interest and service costs

Category	30-06-2019 Valuation. To be used in the 30 June 2017 Actuarial Loss/(Gain) calculation	30-06-2018 Valuation. To be used in the 30 June 2016 Actuarial Loss/(Gain) calculation
Interest cost	1 263 000	1 143 000
Current service cost	1 149 000	1 132 000
	2 412 000	2 275 000

Valuation Method

The Projected Unit Credit funding method has been used to determine the past-service liabilities at the valuation date and the projected annual expense in the year following the valuation date

Long Service Awards Liabilities

Long service benefits are awarded in the form of a number of leave days awarded once an employee has completed a certain number of years in service. We have converted the awarded leave days to a percentage of annual salary by assuming there are 250 working days per year. The expected value of each employee's long service award is projected to the next interval by allowing for future salary growth. The table below contains a summary of the benefit policy:

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Notes to the Annual Financial Statements

Figures in Rand

2019

2018

9. Employee benefit obligations (continued)

Completed Years of Service

	Total Long Service Benefit Award (% of Annual Salary)	Formula used to calculate Total Long Service Benefit Award
10		4% (10/250)*Annual Salary
15		8% (20/250)*Annual Salary
20,25,30,35,40, and 45		12% (30/250)*Annual Salary

The calculated award values are then discounted at the assumed discount interest rate to the date of calculation. We also allowed for mortality, retirements and withdrawals from service as set out in the next section of this report.

The accrued liability is determined on the basis that each employee's long service benefit accrues uniformly over the working life of an employee up to the end of the interval at which the benefit becomes payable. Further it is assumed that the current policy for awarding long service awards remains unchanged in the future.

Valuation of Assets

As at the valuation date, the long service leave award liability of the Municipality was unfunded, i.e. no dedicated assets have been set aside to meet this liability. We therefore did not value any assets as part of our valuation.

In estimating the liability for long service leave benefits a number of assumptions are required. GRAP 25 places the responsibility on management to set these assumptions, as guided by the principles set out in GRAP 25 and in discussion with the actuary.

The assumptions should be realistic and mutually compatible. The difference between the assumptions drives the valuation and it is very important to monitor how this difference changes from one valuation to the next. The most relevant actuarial assumptions used in this valuation are discussed below.

Financial Variables

The two most important financial variables used in our valuation are the discount rate and salary inflation. We have assumed the following values for these variables:

m.m

Capricorn District Municipality

Annual Financial Statements for the year ended 30 June 2019

Notes to the Annual Financial Statements

Figures in Rand

2019

2018

9. Employee benefit obligations (continued)

Financial Variable

	Assumed Value 30-06- 2019 (Current Valuation)	Assumed Value at 30-06- 2018 (Preceding Valuation)
Discount Rate	Yield Curve	Yield Curve
CPI (Consumer Price Inflation)	Difference between nominal and real yield curve Equal to CPI+1%	Difference between nominal and real yield curve Equal to CPI+1%
Normal Salary Increase Rate	Yield Curve Based**	Yield Curve Based**
Net Effective Discount Rate		

Discount Rate

GRAP 25 defines the determination of the Discount rate assumption to be used as follows:

"The discount rate that reflects the time value of money is best approximated by reference to market yields at the reporting date on government bonds. Where there is no deep market in government bonds with a sufficiently long maturity to match the estimated maturity of all the benefit payments, an entity uses current market rates of the appropriate term to discount shorter term payments, and estimates the discount rate for longer maturities by extrapolating current market rates along the yield curve."

*Statement of Financial Position (herein referred to as the "balance sheet").

We use the nominal and real zero curves as at **29 June 2019** supplied by the JSE to determine our discounted rates and CPI assumptions at each relevant time period. For example, a liability which pays out in 1 year will be discounted at a different rate than a liability which pays out in 30 years. Previously only one discount rate was used to value all the liabilities.

** The Net Effective Discount Rate is different for each relevant time period of the yield curves' various durations and therefore the Net Effective Discount Rate is based on the relationship between the (yield curve based) Discount Rate for each relevant time period and the (yield curve based) Salary Inflation for each relevant time period.

Normal Salary Inflation Rate

We have derived the underlying future rate of consumer price index inflation (CPI inflation) from the relationship between the (yield curve based) Conventional Bond Rate for each relevant time period and the (yield curve based) Inflation-linked Bond rate for each relevant time period. Our assumed rate of salary inflation was set as the assumed value of CPI plus 1%. The salaries used in the valuation include an assumed increase on 01 July 2019 of 7.36%. The next salary increase was assumed to take place on 01 July 2020.

In addition to the normal salary inflation rate, we assumed the following promotional salary increases:

Promotional Salary Increase Rates

	539	1 478 490		85 691

Interest Cost

The Interest Cost represents the accrual of interest on the Accrued Defined Benefit Obligation, allowing for benefit payments, over the corresponding year. This arises because the long service benefits are one year closer to payment. This item should be accounted for in the Statement of profit or loss and other comprehensive income (herein after referred to as the "income statement") according to GRAP 25.

Current Service Cost

The Current Service Cost reflects the additional liability that is expected to accrue in respect of in service members' service over the corresponding year. This item should be accounted for in the income statement according to GRAP 25.

Sensitivity Analysis

As mentioned in the introduction of this report, the valuation is only an estimate of the cost of providing Long service leave award benefits. The actual cost to the Municipality will be dependent on actual future levels of assumed variables and the demographic profile of the membership.

In order to illustrate the sensitivity of our results to changes in certain key variables, we have recalculated the liabilities using the following assumptions:

- 20% increase/decrease in the assumed level of withdrawal rates;
- 1% increase/decrease in the Normal Salary cost inflation

Withdrawal rate

Deviations from the assumed level of withdrawal experience of the eligible employees will have a large impact on the actual cost to the Municipality. If the actual rates of withdrawal turns out to be higher than the rates assumed in the valuation basis, then the cost to the Municipality in the form of benefits will reduce and vice versa

We have illustrated the effect of higher and lower withdrawal rates by increasing and decreasing the withdrawal rates by 20%. The effect is as follows:

	-20% Withdrawal rate	Valuation Assumption	+20% Withdrawal rate
Total Accrued Liability	13 539 000	12 836 000	12 197 000
Current Service Cost	1 239 000	1 149 000	1 070 000
Interest Cost	1 337 000	1 263 000	1 196 000
	16 115 000	15 248 000	14 463 000

Normal salary inflation

The cost of the long service awards is dependent on the increase in the annual salaries paid to employees. The rate at which salaries increase will thus have a direct effect on the liability of future employees.

We have tested the effect of a 1% p.a. change in the Normal Salary inflation assumption. The effect is as follows:

9. Employee benefit obligations (continued)

	-1% Normal salary inflation	Valuation Assumption	+1% Normal salary inflation
Total Accrued Liability	12 117 000	12 836 000	13 618 000
Current Service Cost	1 071 000	1 149 000	1 236 000
Interest Cost	1 188 000	1 263 000	1 345 000
	14 376 000	15 248 000	16 199 000

Long-term leave

The municipality, in recognition of services rendered, grants employees 24 working days leave per year.

This leave is cumulative up to a limit of 48 working days.

There is no discounting applied to the calculation of the provision and the amount is based on the estimated 1 July salaries after allowing for an estimated salary increase. The provision is split between that which is expected to be taken within 12 months of the valuation date and that which will be taken after the 12 months.

Movement in the leave provision		
Liability as at 1 July	29 693 031	20 227 136
Annual leave forfeited	-	(161 577)
Net accrued leave days over the years	5 043 718	9 627 473
	34 736 749	29 693 032
Current portion of liability	2 463 131	2 208 774
Non-current portion of liability	32 273 618	27 484 258
	34 736 749	29 693 032

Leave Days Provisional Liabilities

There is no standard actuarial formula that prescribes the way in which the accrued leave days balance should be broken down between short term and long-term components. We recommend that the municipality follow an approach that is consistent with its past experience.

No discounting is applied to the calculation of the annual leave provisions. The leave provision is based on the estimated 1 July 2019 salaries after allowing for an estimated salary increase of 6%. The provision is split between that which is expected to be taken within 12 months of the valuation date (short-term portion) and that which will be taken after 30 June 2020 (long-term portion)

In order to calculate the short term and long-term components of the accrued leave days provisional liability we assumed that;

1. Employees reaching the expected retirement age of 63 over the coming year would cash-in their accrued leave balances in full;
2. Employees resigning from service would cash-in their accrued leave days balances in full;
3. Other employees remaining in service would take their full 24 leave days in the coming year.

We assume that all employees will take up leave to avoid forfeiture of leave days. Employees that resign or retire over the coming year will have their leave balance cashed on resignation/ retirement. We assumed 250 working days per year for the purposes of calculating the value of the accrued benefit. The current portion of the accrued leave also takes into account withdrawals from service over the next 12 months according to the table below.

Withdrawal decrements

2018

35. Key sources of estimation uncertainty and judgements

In using estimates a number of assumptions are required. GRAP 1 places the responsibility on management to set these assumptions, as guided by the principles set out in GRAP 1 and in discussion with the professional consultants.

The assumptions should be realistic and mutually compatible. The difference between the assumptions drives the estimate and it is very important to monitor how this difference changes from one year's estimate to the next.

The following areas involve a significant degree of estimation uncertainty:

- Useful lives and residual values of property, plant, and equipment
- Recoverable amounts of property, plant and equipment
- Present value of defined benefit obligation
- Provision for doubtful debts
- Impairment of assets
- Provision for long-term service award and medical aid benefits

The following areas involved judgements, apart from those involving estimations disclosed above, that management has made in the process of applying the municipality's accounting policies and that have the most significant effect on the amounts recognised in the financial statements:

- Impairment of assets
- Provisions

36. Risk management

Liquidity risk

Liquidity risk is the risk that the municipality will not be able to meet its obligations as they fall due. The municipality's approach is to ensure that sufficient liquidity is available to meet its liabilities when due. The municipality uses cash flow forecasts to ensure that sufficient cash is available to meet expected operating expenses. This is guided by working capital and revenue enhancement policy

The municipality uses cash flow forecasts to ensure that sufficient cash is available to meet expected operating expenses. This is guided by working capital and revenue enhancement policy

The following are contractual liabilities of which the interest is included in borrowings:

At 30 June 2019	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	1 948 162	-	-	-
Operating lease liability	212 296	-	-	-
Trade and other payables	223 968 190	-	-	-
At 30 June 2018	Less than 1 year	Between 1 and 2 years	Between 2 and 5 years	Over 5 years
Borrowings	1 759 133	-	1 948 162	-
Operating lease liability	140 262	-	-	-
Trade and other payables	237 474 984	-	-	-

Notes to the Annual Financial Statements

Figures in Rand	2019	2018
-----------------	------	------

36. Risk management (continued)

Credit risk

Investments

The municipality limits its exposure to credit risk by investing with only reputable financial institutions and within specific guidelines set in accordance with Council's approved investment policy.

Receivables

Receivables are amounts owing by consumers and are presented net of impairment loss. The municipality has a credit control policy in place and the exposure to credit risk is monitored continuously.

The municipality establishes an allowance for doubtful debts that represents its estimate of anticipated losses in respect of receivables. Payments of accounts of consumer debtors who are unable to pay, are negotiated in line with the 'credit control policy and terms of payments are agreed upon with the consumer.

Cash and cash equivalents

The municipality limits its exposure to credit risk by investing with only reputable financial institutions and within specific guidelines set in accordance with Council's approved investment policy. The municipality does not consider there to be any significant exposure to credit risk.

The carrying amount of financial assets represents the maximum credit exposure.

The maximum exposure to credit risk as at 30 June was:

Financial instrument	2019	2018
Call investment deposit	255 042 065	269 752 675
Cash and cash equivalents	1 525 284	4 562 616
Consumer debtors	59 969 762	44 493 685
Other receivables	25 396 949	12 477 763
VAT receivable	21 963 511	41 632 326

Interest rate risk

As the municipality has no significant interest-bearing assets, the municipality's income and operating cash flows are substantially independent of changes in market interest rates.

37. Impairment loss

Property, plant and equipment	(9 873 651)	(3 677 153)
-------------------------------	-------------	-------------

38. Comparison with the Budget

Material differences between budget and actual amounts

The comparison of the Municipality's actual financial performance with that budgeted is set out in the statement of comparison of budget and actual amounts.

The budget is approved on an accrual basis using a classification based on the nature of expenses. The approved budget covers the period from 01 July 2018 to 30 June 2019. The budget and accounting basis are the same.

Changes from the approved budget to the final budget

The changes between the approved and final budget are as a consequence of adjustments and roll-overs of grants

Variances of 10% or more are explained as set out below:

Notes to the Annual Financial Statements

Figures in Rand

2019

2018

38. Comparison with the Budget (continued)

Interest earned outstanding receivables (+100%) The municipality does not budget for interest on outstanding receivables.

Interest earned - external investments (+14%) The municipality has received more investment interest than anticipated.

Contracted services (+10%) Contracted services expenditure more than anticipated. This is as a result of appointments made late in 2017/18 financial year.

Operating lease (-39%) The municipality entered into new lease during the year and the effect of lease straight lining.

Depreciation and amortisation (+16%) More assets were acquired during the year.

Debt impairment Debt impairment expenditure is more than anticipated

Commission expense (-42%) Less expenditure than anticipated due to change in service level agreement.

General expenses (-46%) Less expenditure than anticipated.

The following items were not budgeted for and will have a 100% variance:

* Derecognition of assets

39. Changes in accounting estimates, errors and disclosure

Correction of error

During the financial year under review the following accounting errors were identified;

Reclassification of operating lease expenditure from contracted services to lease rentals on operating leases.

Reclassification of subscriptions and membership fees from contracted services to general expenses

Reclassification of Information services from general expenses to contracted services

Vat receivable was overstated due to transactions which were disallowed by SARS.

Inventory for materials was incorrectly calculated in the previous years.

Other receivables were understated due to water refunds from local municipalities which was understated.

Cash and cash equivalents Aganang petty cash incorrectly accounted for.

Accounts payable understated in previous years due to invoices which were not approved by user departments in the relevant years.

Assets under Aganang Municipality which were incorrectly accounted for.

Cash flow statement

Presented below are those items contained in the statement of financial position and statement of financial performance that have been affected by prior year adjustments and reclassifications.
